## PROJECTS

---

### Crowdfunding Platform using Blockchain | React, Solidity

[Link](#)

- Built a modern and responsive crowdfunding platform that allows users to create, browse, and fund campaigns. Integrated Web3 functionalities using Thirdweb SDK to connect with smart contracts and manage decentralized donations. Implemented tier-based rewards, dynamic campaign statuses (Active, Fulfilled, Expired), and media uploads via IPFS for campaign assets.

### Country Explorer | React

[Link](#)

- Developed a fully responsive React application that fetches and displays data from the REST Countries API. Users can search for countries, filter them by region, and view detailed information including flag, population, capital, and more. Focused on clean UI design, component reusability, and responsive layout for a smooth user experience across all devices.

### Personal Portfolio Website | Javascript, Tailwind

[Link](#)

- Built a responsive personal portfolio using pure JavaScript and Tailwind CSS to showcase Project, Skills and Contact Information
